## Work Experience

*03/2015 - Present*                                      *Bangalore*

### JavaScript Developer
McKinsey Digital Labs

*Tasks/Achievements*

- Worked as a Mobile App Developer on a Survey tool designed for McKinsey Consultants while conducting interviews with the Clients.
- Worked as a Front-end Technical Lead on 3 projects based on ConfirmIT platform to visualise data collected in surveys through various custom charts using Vanilla JavaScript.
- Worked as Lead Mobile App Developer on an iPhone application for McKinsey Partners where the partners can add Client progress and the app creates a leaderboard to track progress of partners within themselves. The app was build on Cordova/AngularJS.
- Worked as a Full Stack developer on a Research Tool for McKinsey firm members and on a cab booking progressive web application. Tech Stack: SailsJS, AngularJS/ES6, Gulp/NPM.
- Worked as a Front-end Technical Lead on medical benchmarking tool. My Job was to build a seamless UI for a user to fill a survey. Tech Stack: Gulp/Browserify/NPM, VueJS/ES6, ConfirmIT.

*08/2014 - Present*                                      *Gurgaon*

### Software Consultant
Xebia IT Architects

*Tasks/Achievements*

- Trained in various Front-end technologies under the Xebia University for a period of 6 Months.
- Worked as a Full-Stack developer for McKinsey Digital Labs, as a part of a Long term engagement to serve McKinsey's Clientele.

*06/2014 - 08/2014*                                      *Gurgaon*

### Web developer Intern
Storehippo

*An eCommerce platform that helps people build stores for selling their products.*
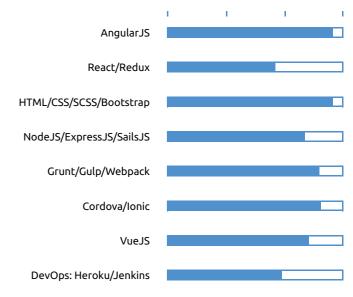

*Tasks/Achievements*

- Worked on various front-end frameworks and libraries including JavaScript, jQuery, AngularJS and Bootstrap.
- One of two people in the batch of 8 to get a full time job offer from the company after 2 months of internship
